

Our company has been conscious to meet the needs and the expectations of our clients, our wholesalers and our installers. Therefore, we have been always in close contact with them. At the same time, we also try our best to determine the basic & important needs of indoor heating & cooling sectors, foresee possible changes in the sector and perform them quickly.

Technology, quality and trustworthiness are on the first place on our priority. Our sense of continuity with superior service, the importance of the relationship with our clients have enabled us to develop ourselves continuously. Our priorities and our understanding of our clients have enabled them to see our company as a reliable partner. Our clients have the biggest share in successful development of our company. At the same, our vision for innovative solutions in this sector lead us to our position of today.

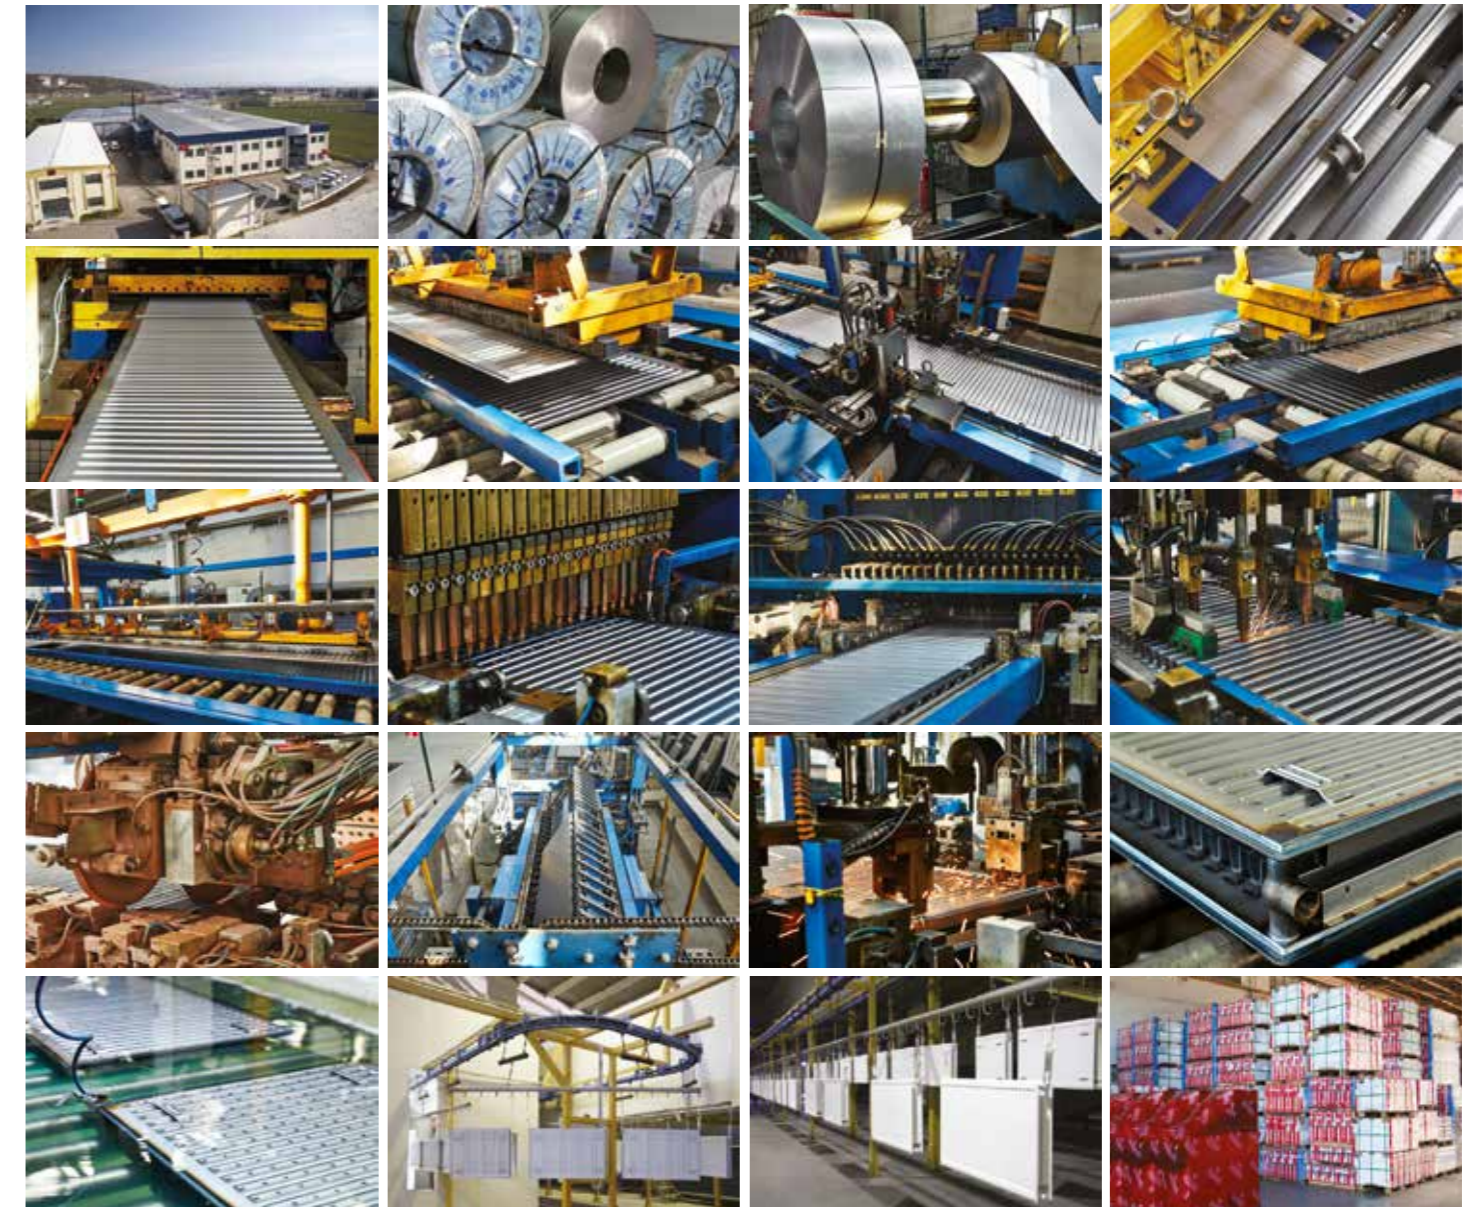

A radiator normally provides comfort on the heating in the living areas. For us, a radiator both supplies comfort on heating in the living area and as well as it provides a significant effect on the appearance and feeling in the areas.

Your Radiator should match your personal style with its colour, design and dimension.

Our company, Üstün Isıtma ve Soğ. Ekip. İml. Paz. San. ve Tic. Ltd. Şti. was founded in 1993 as one of three local steel panel radiator manufacturers. In 1996 the company extended his business to individual and central heating systems. Both factories are located in İzmir / Torbalı on 20.000 m<sup>2</sup> area. The steel panel radiators factory has a yearly capacity of 1.250.000 pieces. The boiler factory is equipped with the hightech production line with automatic forming, lazer cut, welding machineries. The yearly capacity is 10.000 boilers. Our production lines have been developing continuously as to keep the facilities with the latest technologies.

The first steps of the new investments on the production lines are already done early 2016. Innovative new generation product family is included in the product portfolio.

Our domestic sales are made under Termopan brand and our export sales are realised to 25 countries from Europe to America under the brand names of Termopan, Heatmax and Stylerad.

**T**ermopan radiators combine the high production quality with the functionality and attractive design.

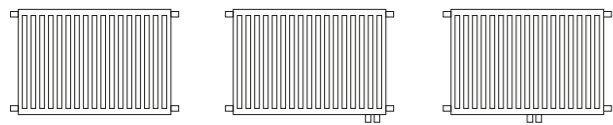

Termopan radiators have a wide range of models consisting of classic profile upto extraordinary designs satisfying all tastes and appreciation with a up-to-date view.
